Work Experience

2024 - AI Researcher

Present *Disney Research* - Zürich, Switzerland

- **Disney+ RecSys.** Building from scratch the new recommender system of Disney+ (semantic tokenization of Disney+ content with RVQ-VAEs, training GPT-style models over quantized semantic tokens).
 - **Speech Search.** Built a real-time speech LLM to search content on the Disney+ catalog, using natural language, exploiting function calls, and RAG.
 - **AI Characters.** Building LLM guardrails for real-time speech-to-speech conversations with LLM-based AI Characters (fine-tuning small guardrail LMs on synthetic data for specific AI characters).
 - **Video Inpainting.** Worked on high-resolution video inpainting, video object removal, and open-vocabulary multi-modal segmentation.
 - **AI Dubbing.** Created from scratch an AI dubbing and subbing pipeline for videos (voice cloning, text-to-speech, speech-to-speech, subtitles translation with LLMs).
- Filed 7 patents.

2022 - 2023 AI Independent Researcher & Engineer

Italy

- **Gucci + Salesspeed AI.** Worked on visual anomaly detection for identifying defects in raw materials used for Gucci products. Specifically, worked on the implementation from scratch, training, and evaluation of the model for anomaly segmentation and detection.
- **Dronus.** Implemented a multi-object tracking system for drones with the aim of identifying objects in industrial settings. Specifically, worked on the model design and training, synthetic data generation, and model evaluation.

04-07/2023 Researcher

Disney Research - Zürich, Switzerland - Internship

Worked on model optimization, transfer learning and knowledge distillation. Developed a new neural network activation that improves accuracy in different domains, such as implicit neural representation, super-resolution, and Monte Carlo denoising. Worked also on its efficient implementation in CUDA/C++ kernels for PyTorch and TensorFlow 2.

- Paper accepted at **NeurIPS 2023** [C8].

12/2021 - **Applied Scientist**

09/2022 *Amazon Web Services AI Labs* - Seattle, Washington - Internship (during the Ph.D.)

Worked with the Rekognition team in a research project focused on video predictive understanding, designing new deep learning models/strategies to anticipate and early-recognize events on videos before they occur.

○ Paper preprint [PP1].

06-09/2020 **Applied Scientist**

Amazon Alexa AI - Turin, Italy - Internship (during the Ph.D.)

Worked in the Automatic Speech Recognition (ASR) team on enabling Alexa to recognizing speech affected by disfluencies and impairments (such as stuttering). During the project, I worked on the multi-lingual modeling of speech disorders, designing and training neural network for ASR, building and mining new relevant datasets, and delivering high-quality results.

○ Paper accepted at ICASSP 2021 [C2].

11/2018 - **Deep Learning and Computer Vision Engineer**

10/2019 *Aquifi Inc.* - Palo Alto, California - Internship (during the Master)

Worked on the development of new deep learning systems for anomaly detection on multi-view structured input images and highly imbalanced datasets. Worked on the designing and training of models, datasets creation and filtration, and the evaluation in different settings. Used a variety of tools, including Python, TensorFlow 1.x, and C++, as well as bash, HTML, javascript, and CSS for experiment visualizations.

Education

2019 - 2022 **Ph.D. in Brain, Mind and Computer Science**

University of Padova, Department of Mathematics and Psychology - Padova, Italy

Thesis: Prediction of Activities and Visual Concepts Under Complex and Changing Conditions

Supervisor: Lamberto Ballan

2016 - 2019 **M.Sc. in Telecommunications Engineering, 110/110 e Lode**

University of Padova, Department of Information Engineering - Padova, Italy

Thesis: Semantic Segmentation for Visual Inspection

Supervisor: Pietro Zanuttigh

2012 - 2016 **B.Sc. in Information Engineering**

University of Padova, Department of Information Engineering - Padova, Italy

Thesis: Algorithms for Sound Synthesis through Physical Modeling

Supervisor: Federico Avanzini

2007 - 2012 **Scientific High School Diploma**

Liceo Scientifico "Ettore Majorana" - Mirano, Venezia, Italy

Academic Work Experience

2020 - 2021 **Teacher Assistant**

University of Padova - Padova, Italy

I have been the teacher assistant for the machine learning course in the Data Science Master Degree. In particular, I gave class lessons to students, prepared the laboratories, prepared machine learning challenges (on deep learning, computer vision, NLP, speech recognition), and I supervised and evaluated the students in their final course project.

2019 - 2023 **Thesis Co-Supervisor**

University of Padova - Padova, Italy

During my Ph.D. I co-supervised several students in their final thesis (9 master students, 1 bachelor student) from the computer science and data science degrees.

2019 - 2023 Service

I served as a reviewer in top venues such as: ECCV-2024, CVPR-2024, ACCV-2024, ICCV-2023, CVPR-2023, BMVC-2023, TPAMI-2022, CVPR-2021, ICPR-2020.

Publications & Writing

Computer Skills

AI/ML - Python, PyTorch, distributed training (multi-node, multi-GPU), slurm, Weights & Biases, TensorFlow 2 (also 1.x in the past), Tensorboard, Keras, NumPy, OpenCV, Pillow, scikit-learn, Pandas, Matplotlib, CUDA (writing customly optimized GPU kernels in CUDA C/C++ for PyTorch and TensorFlow), Hugging Face, JAX (currently learning it), Ultralytics.

Other - Bash, C/C++, Git, AWS (EC2, S3), LaTeX, Web Languages (HTML, CSS, JavaScript, Flask), Matlab, Mathematica, Arduino.

Typical Setup - macOS user for laptops, linux user for servers and desktops, VS Code for writing code (previously experienced Vim user). Usually, I use a 14" MacBook pro, an external frontal monitor 27" and remote linux servers/desktops through ssh.

Languages

Italian Mother tongue

English Full professional proficiency

Extra

2023 **Short Course** - How Diffusion Models Work - *DeepLearning AI*

2023 **Short Course** - ChatGPT Prompt Engineering for Developers - *DeepLearning AI*

2023 **Certification** - 3D Reconstruction, Multiple Viewpoints - *Coursera*

2021 **Pull Request** - Implemented ResNets in the *tinygrad* project (lead by *George Hotz*)

2019 **Certification** - Fundamentals of Reinforcement Learning - *Coursera*

2018 **Certification** - Deep Learning Specialization - *Coursera*

2018 **Certification** - Sequence Models - *Coursera*

2017 **Certification** - Convolutional Neural Networks - *Coursera*

2017 **Certification** - Structuring Machine Learning Projects - *Coursera*

2017 **Certification** - Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization - *Coursera*

2017 **Certification** - Neural Networks and Deep Learning - *Coursera*

2011 **Diploma** - Diploma in Music Theory, *Conservatory Giuseppe Tartini* - Trieste, Italy

Side Experience

2016 - 2018 **Math/Physics Tutor**, *Private lessons* - Padova, Italy

2016 - 2017 **Piano Teacher**, *La Casa Della Musica* - Padova, Italy

Interests

Music, playing guitar, piano, synths, art in general, swimming.
